### Seed balls broadcasting

On October 22, 2023, an impressive initiative was taken by the defence personnel to broadcast seed balls in about 6 – 8 sq.km area in the forest where Jata Teertham is located. 2 lakhs seed balls were distributed to 165 volunteers coming from the entire cross section such as students, military personnel, government officials, and Green Rameswaram volunteers.

These seed balls contained a variety of native seeds, ensuring biodiversity and the adaptation of trees to the local climate and soil conditions. To cover the entire area, a few volunteers went round throwing the seed balls by going on motor cycle.

*Preparation and planning – seed ball distribution*

*volunteers undergoing orientation for the successful implementation of the project*
