

## Livelihood Opportunities

By  
Vivekananda Kendra - Nardep

Fish Amino Acid is useful in agriculture as a growth promoter and can be prepared easily by farmers by using waste fish, jiggery and papaya latex. It is useful as a spray for everything including green vegetables, grains, horticulture etc. Vivekananda Kendra – Nardep have developed the technique of preparing fish amino acid. In this month, Rameswaram people were benefited by undergoing training.

### Fish Amino Acid Training Programme

- Fish Amino Acid Training Programme was conducted at Sri Parvatha Varthini Amman Girls Higher Secondary School, Rameswaram on 9<sup>th</sup> October. 50 students attended.

- Fish Amino Acid Training Programme was conducted at St. Josephs Matriculation School, Rameswaram on 10<sup>th</sup> October. 30 students attended.

### Cultivation of Drumstick and Palm trees

Rameswaram has a potential of marketing Palm and Drumstick products as both the trees are the speciality of Rameswaram. We are serving and interacting with the people to introduce the products of these trees as Livelihood Opportunities.
