Flower Plantation Land Beatification Activity

On November 14, a meaningful environmental initiative was organized at Shriram Creative Vidyalaya School, where 20 seed balls were distributed to the students as part of a tree plantation awareness campaign. The program aimed to encourage young learners to contribute toward environmental conservation through simple yet impactful actions.

After a brief introduction about the benefits of tree planting and the importance of increasing green cover, the students actively participated in planting the seed balls within the school campus. A special highlight of the event was the emotional and thoughtful gesture titled “A Tree for My Mother.” Each student planted a seed ball in dedication to their mother, symbolizing love, gratitude, and respect. This meaningful concept helped the students connect emotionally with nature and reinforced family values along with environmental responsibility.

Teachers and coordinators appreciated the enthusiastic involvement of the students and motivated them to continue nurturing the plants regularly. The school expressed gratitude to the organizing team for providing this valuable opportunity and strengthening environmental awareness among the children. The event concluded with a pledge taken by all students to protect trees and promote green initiatives in their community.

Children are ready to plant their seeds in pots
