

## Marine Bio-Diversity By Green Rameswaram Trust

### Thuimai Mission:

On 13th February 2026, a sea shore cleaning drive was carried out at Arichal Munai under Project Thuimai Mission. A total of 36 participants actively took part in the initiative, including 25 Eco Club students from S.P. Girls Higher Secondary School, 6 Lake Wheel members, and 5 volunteers from Green Rameswaram Trust. The team removed plastic and other non-biodegradable waste from the seashore, segregated the collected materials responsibly, and created awareness among visitors about the importance of maintaining a clean coastal environment. The programme helped improve the cleanliness of the shoreline and encouraged students to take responsibility for protecting nature and preventing marine pollution.
